EC2 > Launch templates > Create template from instance

The Volume initialization rate and ENA queues settings of the source instance have not been automatically included. If they are required, you must manually set them.

×

Create launch template

Creating a launch template allows you to create a saved instance configuration that can be reused, shared and launched at a later time. Templates can have multiple versions.

Launch template name and description

Source instance

l-0c3716k730b31f0e

Launch template name - required

tempd4

Must be unique to this account. Max 128 chars. No spaces or special characters like !, ", *, @, .

Template version description

template

Max 255 chars

Auto Scaling guidance

Select this if you intend to use this template with EC2 Auto Scaling.

☐ Provide guidance to help me set up a template that I can use with EC2 Auto Scaling

Template tags

▼ Summary

Software Image (AMI)

Amazon Linux 2023 AMI 2023.7.2...read more

ami-0a09627f81c8d5778

Virtual server type (instance type)

t2.micro

Firewall (security group)

launch-wizard-4

Storage (volumes)

1 volume(s) - 8 GB

Free tier

In your first year of opening an AWS account, you get 750 hours per month of t2.micro instance usage (or t3.micro where t2.micro isn't available) when used with free tier AMIs, 750 hours per month of public IPv4 address usage, 30 GB of EBS storage, 2 million I/Os, 1 GB of snapshots, and 100 GB of bandwidth to the internet.

Create launch template

EC2 > Auto Scaling groups

Auto Scaling groups (1) info

Launch configurationsLaunch templatesActionsCreate Auto Scaling group

Search your Auto Scaling groups

Name	Launch template/configuration	Instances	Status	Desired capacity	Min	Max	
autoScale44	tempd4 Version Default	0	Updating capacity...	3	1	3	...

0 Auto Scaling groups selected

EC2 > Auto Scaling groups > Create Auto Scaling group

Scaling info

You can resize your Auto Scaling group manually or automatically to meet changes in demand.

Scaling limits

Set limits on how much your desired capacity can be increased or decreased.

Min desired capacity

1

Equal or less than desired capacity

Max desired capacity

3

Equal or greater than desired capacity

Automatic scaling - optional

Choose whether to use a target tracking policy | info

You can set up other metrics-based scaling policies and scheduled scaling after creating your Auto Scaling group.

☐ No scaling policies

Your Auto Scaling group will remain at its initial size and will not dynamically resize to meet demand.

☒ Target tracking scaling policy

Choose a CloudWatch metric and target value and let the scaling policy adjust the desired capacity in proportion to the metric's value.

Scaling policy name

Target Tracking Policy

Metric type info

Monitored metric that determines if resource utilization is too low or high. If using EC2 metrics, consider enabling detailed monitoring for better scaling performance.

Average CPU utilization

Target value

50

EC2 > Auto Scaling groups > Create Auto Scaling group

Step 1: Choose launch template

Step 2: Choose instance launch options

Step 3 - optional: Integrate with other services

Step 4 - optional: Add notifications

Step 5 - optional: Configure group size and scaling

Step 6 - optional: Add tags

Step 7: Review

Configure group size and scaling - optional info

Define your group's desired capacity and scaling limits. You can optionally add automatic scaling to adjust the size of your group.

Group size info

Set the initial size of the Auto Scaling group. After creating the group, you can change its size to meet demand, either manually or by using automatic scaling.

Desired capacity type

Choose the unit of measurement for the desired capacity value. vCPUs and Memory(GiB) are only supported for mixed instances groups configured with a set of instance profiles.

Units (number of instances)

Desired capacity

Specify your group size.

3

Scaling info

You can resize your Auto Scaling group manually or automatically to meet changes in demand.

Scaling limits

Set limits on how much your desired capacity can be increased or decreased.

Min desired capacity

1

Equal or less than desired capacity

Max desired capacity

3

Equal or greater than desired capacity

Automatic scaling - optional

EC2 > Auto Scaling groups > Create Auto Scaling group

Step 1: Choose launch template
